

**Project name:** Culture and Youth information

**Hosting organisation:** Le 4 -

**CAPC Project duration:** 12 months

**Start of the project:** September 2017

**Project venue:** Châtelleraudais is a small town located on a PARIS / BORDEAUX axis, 70 km from Tours and 35 km north of Poitiers (20 Km FUTUROROSCOPE). It is a major industrial city in the past and a rich cultural heritage. The Urban Community of Châtelleraudais Countries (CAPC), through the 4 set up an hosting EVS project, over a period of 12 months, to ensure the cultural missions related information and communication.

### **Project description**

This project exists since a decade but has the objectives born of an observation:

We must educate young people on mobility devices (Erasmus Programme) and open to intercultural. Allow the youth to include mobility in their route of life and facilitate their access to the employment. The need to open the cultural environment (sound, video, image and music) to all. The 4 must be a headend to clarify the offer of information regarding mobility, support project of any kind, offering spaces for the music, the video and the image.

The project will host a volunteer

interested in culture (music, video and image ...)

human contacts and

Intercultural motivated to integrate a young organization dedicated to youth projects ready to live in a dynamic and cosmopolitan city.

This project aims the promotion of European citizenship through the following three areas:

Fulfillment and personal development.

Education in the information, in the creation and the innovation (between individuals, animators and technicians of the 4)

Education in the mobility and in the European citizenship.

The activities offered to volunteers will

be: support in animation

support for the welcome in the structure

development of educational tools based on the multimedia

development of the personal project about the culture, the information

The methodology of project which we set up bases itself on the transversalité of approaches, (cognitive, artistic, communicative, practice ...) and on the learning based on the direct experience. These principles are applicable in all phases of the project, from the conception, the identification of objectives until implementation and evaluation of results.

The expected results are:

implementation of new voluntary home projects in the metropolitan area

Increased number of young people who engage in international mobility experience

Production of paper reportage / picture / video work on personal projects

Creating animation tools

Possible acquisition on behalf of the volunteers of certificates according to the integrated trainings. In particular in French.

The expected long-term benefits are:

accessibility facilitated of the volunteers in the professional environment in their country of origin or in France.

acquisition of the volunteers and the transmission of techniques in sound, video, photo ... awareness of the local community to the challenges of interculturalism

strengthening of the cooperation between the different structures within the urban community

Positioning of the 4 as a head of network regarding support of young people. Real educational platform, with the objective of the development of the initiatives, the support of the innovation and the creation, particularly in the domains of the image, the music and the international mobility.
